

One for all: Printers, labels & much more

We manufacture printers, labels & our own proprietary software

A medium-sized family business, Carl Valentin GmbH has developed, produced, and distributed direct printing (TTO), label printing and labelling systems using direct thermal and thermal transfer printing processes for more than 100 years.

Having our own modern and flexible label production facilities means we are a reliable and competent supplier of labels and transfer ribbons – all perfectly supported by our innovative labelling software.

Perfect product labelling
means you have everything
under control.

Printer families

Today, the whole world prints using solutions from Carl Valentin GmbH. Over 70,000 systems are currently in use worldwide. A global network of sales partners has successfully expanded the long-established company's global reach.

Whether stand-alone modules, built-in modules, direct print modules (thermal transfer overprinters) or customized solutions – Carl Valentin printers are in high demand from every industry worldwide.

Innovative, flexible,
and powerful:
Our solutions
for your business.

Label printers

- > Micra II
- > Pica V
- > Vita V
- > Compa V
- > Vario V
- > Spectra II

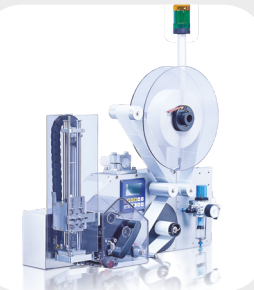

Print engines

- > ILX
- > SPX II
- > SPE II

Direct print modules (TTO)

- > Dynacode II
- > Dynacode II IP
- > Flexicode
- > DPM IV

Print & apply

- > Compa V + Pneumatic-applicator C
- > ILX + Pneumatic-applicator APX 7000
- > ILX + Wipe-on applicators WMX

The new processor. More variable. Faster. Better.

core

10-fold performance increase
compared to the previous system

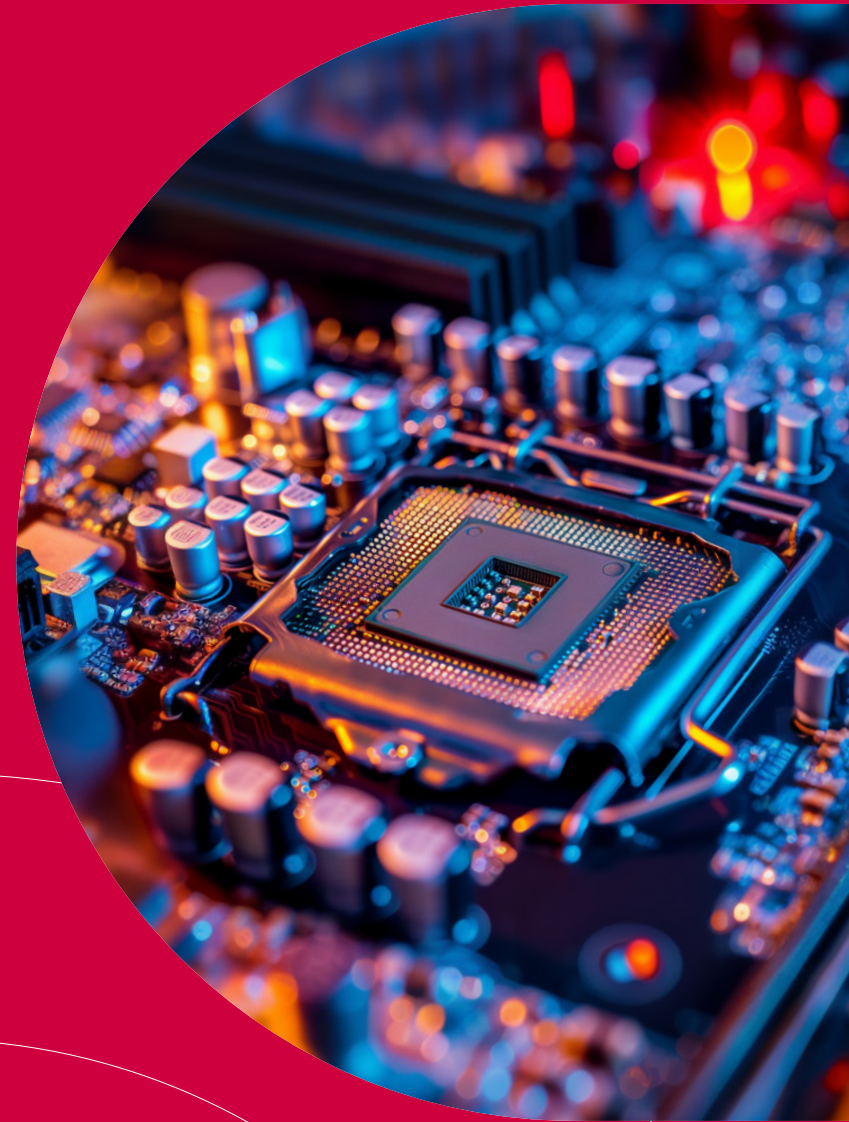

Extended functionalities
offer even more options

Systems are future-proof
and have a long service life

Discover the future of technology with our brand-new products: Vario V, Vita V, Compa V and Pica V. The new V Series processor symbolizes unrivalled performance and efficiency. But this is just the beginning. Going forward, we will continue to focus on innovation and develop further Valentin products based on the new processor generation.

We are supported by a research grant from the German Research Allowance Certification Centre (Bescheinigungsstelle Forschungszulage – BSFZ), which recognizes companies for their innovative expertise.

Labels & transfer ribbons: Ready to print!

What do you require?

We would be pleased to create a customized labelling solution for you. Consultations and solution development are **free of charge**. Simply send your requirements to: labels@carl-valentin.de.

We offer a wide range of labels and transfer ribbons in various qualities and practically any size. Transfer ribbons are available in various colors, qualities, and widths to ensure high-quality printing. Our specialized team works closely with customers to develop and offer customized solutions for specific requirements.

Our software solutions

Companies' labelling requirements are becoming increasingly differentiated. To this end, we strive at Carl Valentin to offer our customers

software solutions that deliver maximum functionality combined with the best possible ease of use.
